TECHNICAL RIDER
DEC 2017

On stage

- 2 musicians
- 1 electric guitar and guitar amp
- 1 vocal mic
- 1 drum set

Projection

This show is a musical accompaniment to film. A projection screen and projector must be supplied and installed, or arrangements made with Modern Robot. The projector must accept HDMI input.

Modern Robot supplies a laptop with a specially edited version of the movie.

Backline

If the venue is supplying backline, requirements are:

- Drum set: 4-piece minimum, to be arranged with Modern Robot
- Guitar amp: Fender Twin, Fender Deluxe, or similar tube amp

Sound Reinforcement

In a small room (up to 100), the guitar and drums may not need to be amplified. In a larger room, a single mic on the guitar amp and appropriate mics on the drum set.

One vocal mic is required for introducing the show and singing during the show.

A 1/8" audio output from the projection laptop plays dialog, this needs a line into the house sound system.

Monitors for the movie dialog are preferred, but not required.

Thanks!
